<td>What is the difference between an Annual, Final, Interim and Project Outcomes Report?</td>
</tr>
</tbody>
</table>

**Annual Project Report**

Annual Project Reports (APRs) are required for Continuing Grant, Cooperative Agreement and Standard award types. Unless otherwise specified in the grant, annual project reports shall be submitted at least three months prior to the end of the current reporting period. In the case of continuing grants, failure to submit timely reports may delay processing of funding increments. All Annual Project Reports for each reporting period must be completed prior to submission of a Final Project Report.

**Final Project Report**

Final Project Reports (FPRs) are required for all Standard, Continuing Grant, Cooperative Agreement and Individual Fellowship (Individual Institutions only and when applicable or cited in solicitations). NSF awards require that the PI submit a Final Project Report to the cognizant NSF Program Officer within 120 days after the end date of the award.

**Project Outcomes Reports**

Project Outcomes Reports (PORs) are applicable to Continuing Grant, Cooperative Agreement and Standard award types. This report serves as a brief summary of the nature and outcomes of the project, prepared specifically for the public. Unless otherwise specified in the grant, project outcomes reports must be submitted electronically via Research.gov within 120 days of the end date of the grant. By submitting the report, the PI is indicating that the scope of work for the project has been completed and that he/she does not anticipate any further action on the grant, including no cost extensions, supplemental funding, or transfer of the grant.

**Interim Project Report**

Interim Project Reports (IPRs) are not required and are used to update the progress of a project any time during or before the award period expires. An Interim Report can be submitted at anytime and does not count as an Annual or Final Project Report.

For more information on the Project Reports System requirements, please refer to Chapter VII.E of the PAPPG.
1.2. B.2 - PI - Report Entry : Cover

![Image of the Research.gov website showing the RPPR Screenshots and Instructions]

**Cover**

Federal Agency and Organization Element to Which Report is Submitted: 1001

Federal Grant or Other Identifying Number Assigned by Agency: 1000001

Project Title: Analysis of Research Data

PD/PI Name: Michael Donner, Principal Investigator

Janet Price, Co-Principal Investigator

Recipient Organization: University of State

Project/Grant Period: 12/29/2013 - 12/28/2017

Reporting Period: 12/29/2015 - 12/28/2016

Submitting Official (If other than PD/PI): N/A

Submission Date: N/A

Signature of Submitting Official (signature shall be submitted in accordance with agency specific instructions): N/A
1.3. B.3 - PI - Report Entry: Accomplishments

Accomplishments - What was done? What was learned?
If there is nothing significant to report during this reporting period, please check "Nothing to Report" if applicable.

- Required fields
- What are the major goals of the project?

What was accomplished under these goals (you must provide information for at least one of the 4 categories below)?

Major Activities:

Specific Objectives:

Characters Remaining: 8000
The information provided in this section allows the agency to assess whether satisfactory progress has been made during the reporting period.

Generally, the goals will not change from one reporting period to the next. However, if the awarding agency approved changes to the goals during the reporting period, list the revised goals and objectives. Also explain any significant changes in approach or methods from the agency approved application or plan.

As the project progresses, the emphasis in reporting in this section should shift from reporting activities to reporting accomplishments.

For NSF purposes, please summarize the contributions to the research and teaching skills and experience of those who have worked on the project, including undergraduate students, graduate students, post-docs, college faculty, and K-12 teachers. If your project supported postdoctoral researchers, then you must include a summary of the mentoring activities conducted.

Training activities may include, for example, courses or one-on-one work with a mentor. "Professional development" activities result in increased knowledge or skill in one’s area of expertise and may include workshops, conferences, seminars, study groups, and individual study. Include participation in conferences, workshops, and seminars not listed under major activities.

Describe briefly what you plan to do during the next reporting period to accomplish the goals and objectives.
1.4. **B.4 - PI - Report Entry: Products**

**Product Summary**
- 1 Product total in current report (08/01/2017-08/31/2018)

**Browse for PDF**: Please select a file.

**Description (required if uploading a file)**: Please provide a description of the content contained in the attached file.
Publications are the characteristic product of research. Agencies evaluate what the publications demonstrate about the excellence and significance of the research and the efficacy with which the results are being communicated to colleagues, potential users, and the public, not the number of publications.

Many projects (though not all) develop significant products other than publications. Agencies assess and report both publications and other products to Congress, communities of interest, and the public.

Agencies are interested in only those publications that most reflect the work under this award in the following categories:

- **Journal publications.** List peer-reviewed articles or papers appearing in scientific, technical, or professional journals. Include any peer-reviewed publication in the periodically published proceedings of a scientific society, a conference, or the like. A publication in the proceedings of a one-time conference, not part of a series, should be reported under “Books or other non-periodical, one-time publications.”

  Identify for each publication: Author(s); title; journal; volume: year; page numbers; status of publication (published; accepted, awaiting publication; submitted, under review; other); acknowledgement of federal support (yes/no).

- **Books or other non-periodical, one-time publications.** Report any book, monograph, dissertation, abstract, or the like published as or in a separate publication, rather than a periodical or series. Include any significant publication in the proceedings of a one-time conference or in the report of a one-time study, commission, or the like.

  Identify for each one-time publication: author(s); title; editor; title of collection, if applicable; bibliographic information; year; type of publication (book, thesis or dissertation, other); status of publication (published; accepted, awaiting publication; submitted, under review; other); acknowledgement of federal support (yes/no).

**Other publications, conference papers and presentations.** Identify any other publications, conference papers and/or presentations not reported above. Specify the status of the publication as noted above.

1.13. B.5 - PI - Report Entry: Participants

![Research.gov screenshot showing the section for participants in a report entry]

- **Participants & Other Collaborating Organizations - Who has been involved?**
  - For NSF purposes, for separately submitted and awarded collaborative proposals, the PI should report progress on the institution’s portion of the collaborative effort only.
  - Each of the subsections below, note which collaborators or contacts are involved in data contribution and/or management.

- **Research Experience for Undergraduates (REU) funding**
  - How many REU applications were received during the reporting period?
  - How many REU applicants were selected and agreed to participate during this reporting period?

- **What individuals have worked on the project?**
  - Show 10 + per page

- **What other organizations have been involved as partners?**
  - No organizations entered.

- **What other collaborations or contacts have been involved?**
  - Nothing to report

1.14. B.5.1 - PI - Report Entry: Participants > Name
• Provide the name and identify the role the person played in the project. Indicate the nearest whole person month (Calendar, Academic, Summer) that the individual worked on the project. Show the most senior role in which the person has worked on the project for any significant length of time. For example, if an undergraduate student graduates, enters graduate school, and continues to work on the project, show that person as a graduate student, preferably explaining the change in involvement.

Describe how this person contributed to the project and with what funding support. If information is unchanged from a previous submission, provide the name only and indicate “no change”.

Identify whether this person is collaborating internationally. Specifically is the person collaborating with an individual located in a foreign country and whether the person had traveled internationally as part of that collaboration and duration of stay. The international country(ies) should be identified.

For NSF purposes, this should read: Identify whether this person is collaborating internationally on this project.

**Example:**

<table>
<thead>
<tr>
<th>Name:</th>
<th>Mary Smith</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Role:</td>
<td>Graduate Student</td>
</tr>
<tr>
<td>Nearest person month worked:</td>
<td>5</td>
</tr>
<tr>
<td>Contribution to Project:</td>
<td>Ms. Smith has performed work in the area of combined error-control and constrained coding. The Ford Foundation (Complete only if the funding support is provided from other than this award.)</td>
</tr>
<tr>
<td>Collaborated with individual in foreign country:</td>
<td>Yes</td>
</tr>
<tr>
<td>Country(ies) of foreign collaborator:</td>
<td>China</td>
</tr>
<tr>
<td>Traveled internationally for this award:</td>
<td>Yes</td>
</tr>
<tr>
<td>If traveled internationally, duration of stay:</td>
<td>5 months</td>
</tr>
</tbody>
</table>

A list of any other funding support, other than this award, that supported the participant’s participation in the project.

- Collaborative research (e.g., partner’s staff work with project staff on the project); and  
- Personnel exchanges (e.g., project staff and/or partner’s staff use each other’s facilities, work at each other’s site).  
- Other.  

More detail on partner and contribution (foreign or domestic) |
1.15. B.6 - PI - Report Entry – Impact

**INSTRUCTIONS** - This component will be used to describe ways in which the work, findings, and specific products of the project have had an impact during this reporting period.

For NSF purposes, include, where appropriate, discussion of data resources and the acquisition of data skills. Include the emergence of new career paths, such as data scientists, or new disciplines.

If there is nothing significant to report during this reporting period, please check "Nothing to Report" if applicable.

**Required fields**

What is the impact on the development of the principal discipline(s) of the project? 

Describe how findings, results, techniques that were developed or extended, or other products from the project made an impact or are likely to make an impact on the base of knowledge, theory, and research and/or pedagogical methods in the principal disciplinary field(s) of the project.

Characters Remaining: 8000
* What is the impact on other disciplines? 1

Describe how findings, results, and techniques that were developed or improved, or other products from the project made an impact or are likely to make an impact on other disciplines.

Characters Remaining: 0

* What is the impact on the development of human resources? 1

Describe how the project made an impact or is likely to make an impact on human resource development in science, engineering, and technology.

Characters Remaining: 0

* What is the impact on physical resources that form infrastructure? 1

Describe ways, if any, in which the project made an impact, or is likely to make an impact, on physical resources that form infrastructure, including physical resources such as facilities, laboratories, or instruments.

Characters Remaining: 0

* What is the impact on institutional resources that form infrastructure? 1

Describe ways, if any, in which the project made an impact, or is likely to make an impact, on institutional resources that form infrastructure.

Characters Remaining: 0

* What is the impact on information resources that form infrastructure? 1

Describe ways, if any, in which the project made an impact, or is likely to make an impact, on information resources that form infrastructure.

Characters Remaining: 0
Over the years, this base of knowledge, techniques, people, and infrastructure is drawn upon again and again for application to commercial technology and the economy, to health and safety, to cost-efficient environmental protection, to the solution of social problems, to numerous other aspects of the public welfare, and to other fields of endeavor.

The taxpaying public and its representatives deserve a periodic assessment to show them how the investments they make benefit the nation. Through this reporting format, and especially this section, recipients provide that assessment and make the case for Federal funding of research and education.

Agencies use this information to assess how their research programs:

- increase the body of knowledge and techniques;
- enlarge the pool of people trained to develop that knowledge and techniques or put it to use; and
- improve the physical, institutional, and information resources that enable those people to get their training and perform their functions.
<table>
<thead>
<tr>
<th>CW B.6-2</th>
<th><strong>Describe distinctive contributions, major accomplishments, innovations, successes, or any change in practice or behavior that has come about as a result of the project relative to:</strong> the development of the principal discipline(s) of the project; other disciplines; the development of human resources; physical, institutional, and information resources that form infrastructure</th>
</tr>
</thead>
<tbody>
